

# Dräger PSS Safety Belt Personal Protection Equipment

---

The Dräger PSS Safety Belt increases wearer safety in potentially hazardous situations by securing the fire fighter whilst working at height: providing work positioning, fall prevention and emergency self-rescue. The multifunctional belt is designed to be easily integrated into the Dräger PSS 5000, PSS 7000 and PSS AirBoss SCBA to safely anchor the wearer, without the need for an additional belt.

# Dräger PSS Safety Belt

## Pouch

Prevents the risk of lanyards snagging

## Aramid performance webbing

Highest quality according to EN 137:2006 type 2

## Pull forwards waist adjustment

Ease of fitting for professional fire fighting

**Closed single piece high-tech harness**  
preventing excessive water and chemical absorption, reducing cleaning and drying time

## Sliding lock waistbelt attachment

Retained for quick removal and serviceability

## Stainless steel adjusters

Secure controlled, smooth webbing adjustment and easy release

## Auxiliary rings

Allow attachment of additional accessories

## Dräger PSS 5000

with integrated Dräger PSS Safety Belt

# Benefits

## Multi-functional solution

Firefighting involves high level of risks, which can significantly rise when working at heights, like bevelled roofs or ladders. The Dräger PSS Safety Belt is designed as an integrated system and stand-alone solution to facilitate:

- work positioning
- fall prevention
- self-rescue (in case of emergency)

## Integration of comfort and safety

Fire fighters often have to wear a safety belt in addition to their SCBA. This means the comfort, fit and ergonomic performance of the SCBA can be affected. The Dräger PSS Safety Belt is designed as an integral system component of the SCBA. It replaces the original Dräger PSS 5000, PSS 7000 or PSS AirBoss waistbelt without compromising the performance of the Safety Belt or the SCBA.

## Designed for firefighting operations

The Aramid webbing used in the design and construction of Dräger PSS Safety Belt allow it to meet the key European approval requirements of both SCBA (EN 137:2006 type 2) and holding belt systems (EN 358:1999) in a single device. This means that it can be used in the same extreme heat and hot fire environments as the SCBA, without compromising either the integrity of the system or the safety of the fire fighter. Even after being exposed to a continuous temperature of 200°C or a short term peak load of over 400°C, the PSS Safety Belt still retains its material properties e.g. tensile strength according to EN 358:1999. At the same time it provides the high level of comfort and ergonomics already known from the Dräger PSS 5000, PSS 7000 and PSS AirBoss.

## Quick to deploy and easy to use

The PSS Safety Belt uses the familiar Dräger slide and lock method, which attaches the waistbelt to the SCBA backplate. This allows an easy attachment and detachment of the Safety Belt for servicing and maintenance. It also facilitates a quick and easy upgrade of the existing PSS 5000, PSS 7000 or PSS AirBoss to an integrated SCBA and PSS Safety Belt system.

The PSS Safety Belt features a pull forward waist adjustment for fast donning in tight spaces. Besides this the metal waistbelt and adjusting buckles make for easy adjustment of the SCBA.

## Safety and handling

The two lanyards are contained in slim-line pouches on the left and right sides of the belt. The pouches are permanently fixed to the belt. This way they protect the lanyards from snagging and damage, whilst at the same time allowing a quick and easy access. Two integrated auxiliary rings, one on each side of the belt enable the attachment of fire fighters accessories to the SCBA.

## Upgrade options

The following upgrades are available for the Dräger PSS 5000 and PSS 7000:

- a kit to upgrade the Dräger PSS 7000 with an integrated PSS Safety Belt
- a kit to upgrade the Dräger PSS 5000 DP or PSS AirBoss with an integrated PSS Safety Belt

# System Components

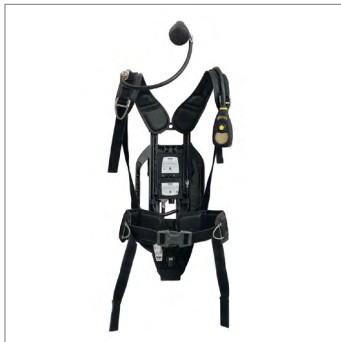

D-4266-2010

## Dräger PSS 5000

The Dräger PSS 5000 SCBA is a high-performance breathing apparatus for the professional firefighter. Combining advanced ergonomics with a wide range of configurable options, the Dräger PSS 5000 provides the user with the comfort and versatility to meet the demands of first responders whenever breathing protection is required.

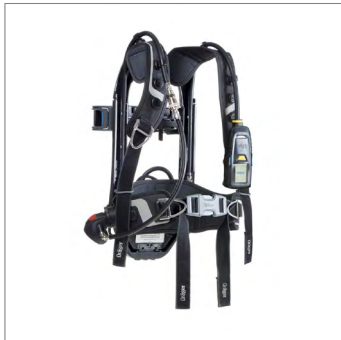

ST-6147-2007-1

## Dräger PSS 7000

Developed by professionals for professionals, the Dräger PSS 7000 breathing apparatus is a major milestone in our continuing development of breathing devices for the professional firefighter.

D-35386-2021

## Dräger PSS AirBoss

The Dräger PSS AirBoss offers best in class ergonomics and is one of the lightest weight breathing apparatus for firefighting. Lessons learned from firefighters around the world as well as latest innovations in technology have led us to design an even safer and cleaner SCBA system that enables you to breathe more easily and for longer.

D-38263-2015

## Dräger Bodyguard 1000

Designed to protect life by alerting the team when a wearer becomes motionless or distressed, the Dräger Bodyguard 1000 emits clear and distinctive signals and alarms to ensure quick and effective recognition, even in the worst environmental conditions.

# System Components

D-57238-2012

## Dräger Bodyguard 1500

Dräger Bodyguard 1500 is an automatic wireless PASS system which increases wearer safety in potentially hazardous situations. The system draws attention to colleagues in distress by generating distinctive visual and acoustic alert signals and features wireless data transmission from the pressure gauge to the PASS device.

ST-6168-2007

## Dräger Bodyguard 7000

The Dräger Bodyguard 7000 is an electronic monitoring unit which provides continuous monitoring of personal information and operational status of the Dräger PSS 7000 and PSS 5000 self contained breathing apparatus.

D-36356-2021

## Dräger Compressed Air Breathing Cylinders

Designed using leading technology and advanced materials, you can use our Dräger compressed air cylinders in any application where breathing protection is needed. We offer you a broad range, from carbon composite to steel cylinders. You especially benefit from their lightweight and Non-Limited Life (NLL) performance.

D-5014-2024

## Dräger PSS Lung Demand Valve (LDV)

Suitable for the most extreme applications whenever breathing apparatus has to be worn: with its compact and robust design, and excellent pneumatic performance, the Dräger PSS Lung Demand Valve (LDV) will always deliver the air that you need.

# System Components

D-4986-2024

## Dräger FPS 7000

The Dräger FPS 7000 full-face respiratory protection mask sets new standards in safety and wearing comfort. Its proven design offers a wide, optimised field of vision and comfortable, reliable sealing in various sizes. The FPS 7000 RA is compatible with all Dräger X-plore 8000 powered air-purifying respirators.

ST-9907-2006

## Dräger FPS 7000 Head-Up-Display (HUD)

One of the many benefits of the FPS 7000 full face mask is the option of fitting a head up display. Always within the field of view the head up display allows easy monitoring of the cylinder contents without any manual action by the wearer.

# Accessories

D-31791-2015

## Lanyard pouches

The lanyard pouches store the Aramid lanyard neatly away, preventing snagging. The pouches are available in right and left side versions, allowing easy access for lanyard deployment. Secured to the Dräger PSS Safety Belt main waistpad by pull-the-dot fasteners, as used on the Dräger PSS 5000 and PSS 7000 SCBA series, helping ensure the pouches can't be easily detached during use.

D-31792-2015

## Lanyard

Constructed from Aramid high performance webbing, the lanyard can be used on right or left side of the Dräger PSS Safety Belt for positioning / fall prevention with a working length of 0.55m. Deployment is via red easily identifiable pull tapes ensuring accessibility whenever required.

D-31789-2015

## Karabiner

Manufactured from stainless steel and certified for use with SCBA and for work positioning and prevention of falls from height, the 2 way twist and lock style Karabiner is simple to use yet entirely dependable.

# Technical Data

## Dräger PSS Safety Belt

Weight of Dräger PSS Safety Belt (stand-alone)	1.606 kg
Operating temperature (°C)	-30 to +60 flame-engulfment tested according to EN 137:2006

## Approvals

Breathing Apparatus	EN 137:2006 type 2
Holding belt system	EN 358:1999
