

Dräger PARAT 1260 Filtering Escape Device

Designed with simplicity in mind, the Dräger PARAT 1260 is an extra small mouthpiece / nose clip filtering escape device equipped with a multi-gas ABEK filter that offers you 10 minutes of protection against a variety of toxic industrial gases and vapours. The device and filter are vacuum sealed in an aluminum barrier bag, making it better suited for diverse climate zones.

Dräger PARAT 1260

Small size

Makes it easy to carry along using the integrated belt clip, the carrying bag or even simply in a pocket.

Robust case

Suitable for daily use in rough work environments.

Aluminum barrier bag

Mouthpiece and filter are vacuum sealed in a robust barrier bag for additional safety.

Transparent case

Visual inspection of device, expiry date, and donning instructions, information remains protected against rubbing off.

D-36244-2021

Anti-tamper seal

Gives a clear indication if the device has been opened or if it is ready for use.

Mouthpiece with nose clip

Extremely low leakage, easy to don, and well suited for bearded wearers.

Nose clip

Soft material provides comfortable fit on your nose.

Overall lifetime

6 years maintenance-free.

Benefits

The smallest escape respirator in the PARAT family

Because size matters in an emergency, we designed the PARAT 1260 to fit in the palm of your hand, making it incredibly easy to handle. Not only is the PARAT 1260 conveniently small in size, it is equipped to give you 10 minutes of lifesaving protection against a variety of industrial gases and vapours. It is approved to the only recognized standard for filtering industrial escape devices (DIN 58647-7). Moreover, the device is suitable for persons who wear glasses or have beards.

Robust case with added safety

The robust case protects the device under extreme working conditions. To ensure the device remains secure when not in use, we have incorporated an anti-tamper seal - the seal breaks as soon as you open the case.

For additional safety, the mouthpiece and filter are vacuum sealed in a robust aluminum barrier bag to protect the system in a wide variety of ambient conditions.

The compact form of our escape respirator makes it easy for you to carry in all types of scenarios. So small you can carry it in your pocket. Additionally, the integrated belt clip makes it comfortable for you to carry on a belt or on your working clothes.

A clear view inside

With the PARAT 1260, you know exactly what's inside. We understand the benefit of being able to see the components of a product. For this reason, the case features translucent elements, enabling you to visually inspect the device and have a clear view of all pictograms (e.g. donning procedure). Furthermore, you can see the filter expiration date without the information rubbing off as it is protected against abrasion.

Maintenance-free

The PARAT 1260 offers you simple, safe, and sound technology. When seconds count, you need to rely on an escape respirator that provides adequate escape time and the least amount of maintenance. We offer you a 6-year maintenance-free lifetime, provided the anti-tamper seal remains intact.

Dräger PARAT Filtering Escape Hoods

The PARAT filtering escape hoods were developed with users, placing the focus on the fastest possible escape. Optimized operation and wearing comfort, a robust case and a sealed filter ensure protection from toxic industrial and/or fire-related gases, vapours and particles for at least 15 minutes.

Technical Data

Dräger PARAT 1260

Filter performance	ABEK10 gas filter for protection against organic and anorganic gases and vapours, approved in accordance with DIN 58647-7
Duration of use	At least 10 minutes
Shelf life	6 years maintenance-free
Weight	Approx. 220 g
Dimensions (height x width x depth)	115 x 95 x 70 mm
Approval	Approved in accordance with DIN 58647-7 (CE mark 0158)

Filter capacity according to DIN 58647-7*

Type	Test gas	Concentration in ppm	Breakthrough in ppm	Minimum breakthrough time in min
A	Cyclohexane (C ₆ H ₁₂)	2,500	10	10
B	Chlorine (Cl ₂)	2,500	0.5	10
B	Hydrogen sulphide (H ₂ S)	2,500	10	10
B	Hydrogen cyanide (HCN)	2,500	10	10
E	Sulphur dioxide (SO ₂)	2,500	5.0	10
K	Ammonia (NH ₃)	2,500	25	10
B	Hydrogen sulphide (H ₂ S)	10,000**	20	3

* Test conditions according to DIN 58647-7: 30 l/min, 70 % relative humidity, 20 °C.

** To determine the breakthrough capacity of the gas filter it is additionally tested with 10,000 ppm hydrogen sulphide.
